

Management Plan

1. Overview

This document is to list the develop team, review the release plan of the product, and estimate the development resource demand to set the goal for the entire development procedure.

2. Members

The development of this project is assigned to Jiupeng Zhang, Tianqi Yang and Yu Zhang.

3. Software release plan

The demanded deadline is Nov 14, 2018 according to the schedule of customer. At that time the beta version of product will be released and basic function will be realized. Beta version of product will pass end to end test in previous document.

4. Development resource management

The estimated resource requirement of development is 120 man-hour. The estimated resource of each module is listed as follows:

- **Repository** 20 man-hour
- **Revision** 40 man-hour
- **Manifest** 30 man-hour
- **Changeset** 30 man-hour

The resource needed for end to end test is roughly estimated as 20 man-hour.

Total development resource current available is 130 man-hour. In additional to 120 man-hour development cycle, 10-20 man-hour is reversed for the debug or hotfix procedure.
